TITLE	Students' Guide to Engineering Schools.
INSTITUTION	National Action Council for Minorities in Engineering, Inc., New York, NY.
PUB DATE	86
NOTE	45p.
AVAILABLE FROM	NACME Inc., 3 West 35 Street, New York, NY, 10001 ($8.00 per hundred)
PUB TYPE	Guides - Classroom Use - Materials (For Learner) (051)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*College Choice; *College Curriculum; Colleges; *Engineering Education; Enrollment; Guidelines; Higher Education; *Minority Groups; Services; *Student College Relationship; Student Financial Aid; Undergraduate Study
IDENTIFIERS	*College Characteristics Analysis; Dual Degrees

ABSTRACT

Designed for minority students considering careers in engineering, this guide provides descriptions of every undergraduate engineering college in the United States with at least one curriculum approved by the Accreditation Board for Engineering and Technology, and guidelines for assessing educational wants and needs. Entries for each of the 261 schools indicate mailing address, 1984-85 minority/total undergraduate engineering enrollment, cutoff dates for admissions/financial aid, undergraduate engineering curricula offered (aeronautical/aerospace/astronautical, agricultural, architectural, bioengineering/biological/biomedical, ceramics, chemical, civil/construction, computer, electrical/electronic, general, engineering physics/science, environmental, geological/geophysical, industrial/manufacturing, materials/metallurgical, mechanical, mining, naval/marine, nuclear, ocean, petroleum/natural gas, systems, others), support activities and financial aid. Support activities cover special recruiting, special admissions, freshman orientation program, summer program for entering freshman, special personal counseling, special tutorial activities, co-op program, summer jobs, dual degree program, minority financial aid program, and minority engineering student organization. Types of financial aid described include grants, loans, tuition reduction, employment and 1985-86 National Action Council for Minorities in Engineering incentive grants. Guidelines cover choice of the "right" college, compatibility with academic abilities, expectations for support services, concerns of minority applicants, financial aid needs, dual degree programs, cooperative education programs, and the application process. Schools offering dual degree programs and their affiliated colleges and incentive grants participating schools are listed. (NEC)

About NACME

NACME is the National Action Council for Minorities in Engineering, Inc., a non-profit organization founded to act as catalyst in the minority engineering education effort. This movement, started more than a decade ago by companies, educators, professional societies and minority organizations, strives to increase the number of underrepresented minorities who graduate from accredited engineering schools.

NACME plays a key role in this effort by initiating, facilitating and developing both programs and services that make it possible for a growing pool of Blacks, Mexican Americans, Puerto Ricans and American Indians to earn baccalaureate degrees in engineering.

As an enabling organization, NACME achieves its goals in a variety of ways. Its Incentive Grants Program is the nation's largest privately supported scholarship fund for minorities in engineering. Its Field Services Program supports local and regional organizations with grant monies and with technical assistance in establishing and strengthening precollege and university programs. And NACME's active research and publications programs make vital information available to students, parents, educators and corporate supporters.

Foreword

The *Students' Guide to Engineering Schools* contains descriptions of every undergraduate engineering college in the United States with at least one curriculum approved by the Accreditation Board for Engineering and Technology (ABET).* ABET is a federation of national engineering organizations which reviews and accredits Engineering and Engineering Technology programs. This accreditation means that the programs listed here meet the stringent criteria established by the engineering profession.

The details about each school are based on program information supplied by the colleges themselves and enrollment data compiled by the Engineering Manpower Commission (EMC).

* Data from *Accredited Programs Leading to Degrees in Engineering,* 1984, Accreditation Board for Engineering and Technology, Inc., New York, N.Y., and new programs listed in the 1985 Addendum.

Selecting the "Right" College

Chances are there are many schools that could be called "right" for you. After all, every college listed here offers a sound engineering education and the basic core of the engineering curriculum doesn't vary much from school to school. Yet there are numerous factors about a college – and about you – that can influence how successful you will be. Although NACME can't rate schools or match an individual student with a perfect program, we can help you become knowledgeable about shopping for an engineering education.

Know Your Needs

The most important thing you can do to narrow the choice of available schools is to make a careful assessment of your own wants and needs. A good place to start this analysis is with answers to questions that are common to many high school seniors.

DO YOU WANT TO GO TO SCHOOL IN YOUR HOME TOWN OR AWAY FROM IT?

Going away involves additional costs. But if going to school in your home town means that you'd probably live at home, with all the distraction of family and friends, then going away or at least living on campus may be the better choice. Students who live on campus have more opportunity to become part of school life. They make friends of like interests with whom they can socialize and study, and as a result, they have a better chance of graduating.

WHICH SCHOOLS WILL BE COMPATIBLE WITH YOUR ACADEMIC ABILITY?

Use *Peterson's Guide to Undergraduate Engineering Study* and other college guides, which are available in bookstores, to find out how comfortable you would be in a school's academic environment. Look to see how your grades, ACT and SAT scores stack up against those of the typical engineering freshman at the institution. If, for example, your math SAT is more than 75 points below that of the average freshman, you may be in for a difficult time academically. One exception to this rule occurs at colleges with good support programs for engineering students. Consider these schools if they have demonstrated success and will tell you that students with an academic background like yours stand a good chance of graduating.

WHAT KIND OF SUPPORT SERVICES DO YOU EXPECT A SCHOOL TO PROVIDE?

Many pre-engineering students have excellent high school records and expect the same easy successes in college. That doesn't necessarily happen. Engineering school is rigorous and competitive. You will have to study a lot longer and a lot harder than you did in high school. If a college offers help – tutorial sessions, individual or group counselling, the opportunity to take a reduced course load if necessary – your chances of doing well will be greatly improved.

WHAT SPECIAL CONCERNS DO YOU HAVE AS A MINORITY APPLICANT?

While college provides the opportunity for you to meet many people from varying backgrounds, you may want to find out how many minority students attend the school and whether there are any special services available to them. For example, a large number of colleges and universities now have Minority Engineering Programs (MEPs) that were specifically established to provide academic, emotional and financial support to minority students. According to some experts, an MEP program can mean as much as half a point on a student's grade point average – often the difference between success and failure. Schools that offer such support are noted with the symbol (†) next to their names.

HOW WILL YOUR FINANCIAL AID NEEDS BE MET?

When a student requires financial aid, the college financial aid office determines how much it will provide from a variety of sources. This package is made up of different grants and scholarships that are distributed by the school. One of these scholarship sources is the NACME Incentive Grants Program (IGP). NACME provides approximately $3,000,000 yearly awarded as block grants to some 145 participating engineering schools. The colleges, in turn, award scholarships to almost 4,000 minority undergraduates. If you are interested in an IGP scholarship, apply directly to the participating schools which are indicated in the last column of the listings in this book.

Any scholarship aid you receive from a source other than the university financial aid office, say your parent's employer, must be reported to the school, which may reduce your aid package by that amount. The same may be true if you have savings or earnings from a summer job. The important thing to know is whether the amount you're getting from all sources meets your full need at that school.

Each college will tell you how many dollars it costs to get through a typical year. Is that amount what you'll have? If your full need is not met with some combination of grants, parental contribution, expected summer earnings, scholarship, work opportunity, and loan, be very wary. You don't want a gap left to fill after all possible sources have already been considered.

Also, make a critical judgement about the look of your financial aid package. Will you have to take out so large a loan that it will worry you? Are you expected to come up with summer or part-time earnings that are unrealistically high? Is your package like that of other students and can you talk to upperclassmen to see how they've managed on the allotted amount?

Finally, if you remain in good academic standing, will the school continue to fund you in pretty much the same way? Some schools put together very attractive initial financial aid packages to interest the students they want. In subsequent years, they may change the proportion of the grant/loan mix. You may also want to find out exactly what "good academic standing" means at each school. If your grade level dips below C, will your aid automatically be taken away?

WHAT OTHER GUIDELINES CAN YOU USE TO HELP YOU SELECT A SCHOOL?

As you learn more about the various schools you are considering, new questions will surface about every aspect of college life. Many of these will be related to the college's rate of success with its students. You may want to ask, "How many freshmen make it to sophomore standing?" "What percentage of entering freshmen graduate?" "Is the college effective in helping students find engineering-related summer jobs?" In short, what kind of commitment has this college made to its students and what kind of commitment can you expect it to make to you?

Once you've thoroughly investigated academics and finances, there remains one intangible left to evaluate – the question of "fit." Every school has an atmosphere, a special feel about it that makes it different from anywhere else. If at all possible, visit your college of choice. See how comfortable and friendly it seems to be – whether it's an environment in which you think you'll be happy. Certainly, once you've been accepted, make every effort to visit the school before responding to an offer of financial aid or a place in the freshman class.

Look Into Special Programs

Once you've completed taking introductory courses, it's important that the school you choose offers engineering curricula in the areas that most interest you. This booklet notes which ABET accredited bachelor's degree programs are available at the listed schools. Within groups there are many sub-programs. Use college catalogs to determine which courses of study are available.

DUAL DEGREE PROGRAMS

Dual Degree Programs can provide you with the opportunity to study both engineering and liberal arts in depth. Through cooperative arrangements between engineering colleges and liberal arts schools, these programs allow students to graduate with an undergraduate degree (usually an A.B. or B.S.) and a professional degree in engineering. The Dual Degree Program is usually referred to as a "3-2" program since five years are often required for its completion – 3 years for the liberal arts portion and 2 years for the engineering portion. A listing of participating schools is located at the end of this book.

COOPERATIVE EDUCATION PROGRAMS

Cooperative Education Programs consist of alternate periods of full-time college study and full-time work assignments. They give students the chance to obtain practical career experience in the field of engineering while completing an academic degree. In most co-op programs, work and study are interspersed on a year-round basis which includes the summer term. This regular access to employment not only provides professional engineering experience, but financial support as well.

The Applications Process

Write to each of the schools that interests you requesting both a catalog and an application form. This initial correspondence should be sent to the Director of Admissions at the school, state and zip code listed in this book. Any further questions you may have should be addressed to an appropriate individual whose name you find in the information package supplied by the school.

CUTOFF DATE

The cutoff date listed for each school is the final date preceding your intended enrollment that application forms will be accepted. For example, if you plan to enroll in the fall of 1987, 8/10 means August 10, 1987, and 11/15 means November 15, 1986. The word "open" in the cutoff date column means that the university does not formally close its admissions process. However, you should realize that engineering schools have a limited number of freshman places available and that the later you apply, the greater the chances are that these spots will be filled.

APPLYING FOR FINANCIAL AID

If you are applying for financial aid, there are at least two forms that you must file in addition to your application for admission. The first of these is an application for financial assistance that goes directly to the college. This form must be submitted with attention to a second cutoff date established by the financial aid office and listed in this book.

With the assistance of your parents, you will also be required to fill out and submit a "Financial Aid Form" (FAF) which goes to the College Scholarship Service (the College Board) or the American College Testing Service (ACT). This is the form that will be used to evaluate your financial need and to determine your eligibility for federal and state assistance programs. Individual states may require additional forms if you are applying for state aid.

Every university financial aid office should have all of these forms available as well as information about deadlines for filing. For details about specific scholarships available to minorities in engineering, you may write to NACME.

USE EVERY RESOURCE AT YOUR DISPOSAL

Applying to college can be made considerably easier if you use the network of resources that has been set up to help you. Chances are, your high school has a guidance counselor who has been through this process many times with many students. When you make an appointment to speak with someone in the guidance office, be prepared to share the decisions you've made about what you want so you get the best advice available.

Speak with your math and science teachers who may be familiar with the engineering schools at area colleges, and, if you participate in any kind of engineering club, get all the information you can from the teachers or volunteers who run the program.

Dual Degree Programs

The following institutions offer Dual Degree Programs in the United States. Their affiliated colleges have been listed where that information was supplied.

Arkansas, University of
- Ouachita Baptist University
  Arkadelphia, AR 71923
- College of the Ozarks
  Clarksville, AR 72830
- Harding University
  Searcy, AR 72143
- Centenary College of Louisiana
  Shreveport, LA 71104
- School of the Ozarks
  Point Lookout, MO 65726

Boston University
- Antioch College
  Yellow Springs, OH 45387
- Clark College
  Atlanta, GA 30314
- Eastern Nazarene College
  Quincy, MA 02170
- Edgecliff College
  2220 Victory Parkway
  Cincinnati, OH 45206
- Mills College
  Oakland, CA 94613
- Morehouse College
  Atlanta, GA 30314
- Morris Brown College
  Atlanta, GA 30314
- Saint Vincent College
  Latrobe, PA 14540
- Spelman College
  Atlanta, GA 30314
- Simmons College
  Boston, MA 02115
- Suffolk University
  Boston, MA 02115

Bucknell University
- Lycoming College
  Williamsport, PA 17701
- Susquehanna University
  Selinsgrove, PA 17870

Catholic University of America
- Georgetown University
  Washington, DC 20054
- Sienna College
  Loudonville, NY 12211

Christian Brothers College
- LeMoyne-Owen College
  Memphis, TN 38126

Clarkson University
- Brockport State University College
  Brockport, NY 14420
- Castleton State College
  Castleton, VT 05735
- Cortland State University College
  Cortland, NY 13045
- Fredonia State University College
  Fredonia, NY 14063
- Geneseo State University College
  Geneseo, NY 14454
- Hartwick College
  Oneonta, NY 13820
- Houghton College
  Houghton, NY 14744
- Juniata College
  Huntingdon, PA 16652
- Manhattanville College
  Purchase, NY 10577
- Oneonta State University College
  Oneonta, NY 13820
- Oswego State University College
  Oswego, NY 13126
- Plattsburgh State University College
  Plattsburgh, NY 12901
- Potsdam State University College
  Potsdam, NY 13676
- Roberts Wesleyan College
  Rochester, NY 14624
- Saint Rose College
  Albany, NY 12203
- Siena College
  Loudonville, NY 12211
- Skidmore College
  Saratoga Springs, NY 12866
- St. Bonaventure University
  St. Bonaventure, NY 14778
- St. John Fisher College
  Rochester, NY 14618
- St. Lawrence University
  Canton, NY 13617
- St. Michael's College
  Winooski, VT 05404
- Wells College
  Aurora, NY 13026

Clemson University
- Armstrong State College
  Savannah, GA 31419-1997
- Baptist College at Charleston
  Charleston, SC 29411
- Beirut University College
  New York, NY 10115
- Benedict College
  Columbia, SC 29204
- The College of Charleston
  Charleston, SC 29424
- Erskine College
  Due West, SC 29639
- Francis Marion College
  Florence, SC 29501
- Furman University
  Greenville, SC 29613
- Lander College
  Greenwood, SC 29646
- Livingstone College
  Salisbury, NC 28144
- Newberry College
  Newberry, SC 29108
- North Georgia College
  Dahlonega, GA 30533
- Presbyterian College
  Clinton, SC 29325

Columbia University

New York Colleges:
- Adelphi University
  Garden City, NY 11530
- Alfred University
  Alfred, NY 14802
- Bard College
  Annandale-On-Hudson
  NY 12504
- Barnard College
  606 W. 120th St.
  New York, NY 10027
- Colgate University
  Hamilton, NY 13346
- Columbia College
  New York, NY 10027
- Fordham University
  East Fordham Rd.
  Bronx, NY 10458
- Hamilton College
  Clinton, NY 13323
- Hartwick College
  Oneonta, NY 13820
- Hobart and William Smith Colleges
  Geneva, NY 14456
- Hofstra University
  1000 Fulton Ave.
  Hempstead, NY 11550
- Queens College
  Flushing, NY 11367
- School of General Studies
  Columbia University
  New York, NY 10027

NACME Incentive Grants

NACME's Incentive Grants Program is the nation's largest privately supported source of scholarship funds available to minorities in engineering. Yet NACME makes no awards directly to students.

Instead, NACME monies go to participating colleges and universities which, in turn, award student scholarships ranging from $250 to $2,500 per year. By placing the largest block grants with engineering schools that have demonstrated progress in recruiting, enrolling and graduating minority students, NACME encourages both individual achievement and institutional change.

While the criteria for college and student participation are under continuing review, the following requirements guided the distribution of 1985-86 Incentive Grants.

COLLEGE PARTICIPATION

In order to participate in the Incentive Grants Program, colleges must demonstrate:

—at least one program accredited by ABET;
—a minimum enrollment of 150 minority engineering majors, or at least six percent minority representation in engineering; and
—essential support services designed to aid in the retention and graduation of minority students.

STUDENT SELECTION

NACME established standards guide the schools in distributing scholarships. To qualify for an Incentive Grant award, incoming freshmen and transfer students must possess academic records that indicate the potential to earn an engineering degree. In addition, a student must be:

—Black, Mexican American, Puerto Rican or American Indian;
—a United States Citizen or permanent resident;
—enrolled full time in an undergraduate engineering program; and
—in need of financial assistance or designated to receive a NACME Merit award.

After the initial grant is made, a student can expect support through five years of undergraduate education at the same school as long as full-time status and good academic standing are maintained.
